

5 Signs

You're Ready for Next-Level Cloud

Answer these questions to find out whether your business is ready for a fresh approach to cloud.

Growing numbers of organizations have made the switch to managed private cloud. Find out if it could be the right option for you. Use the following questions as a guide to understand whether you've outgrown your current infrastructure and what to look for in a best-fit approach.

1 Internal skill and resource gaps:

- ☐ Would you **dedicate more resources to strategic efforts** if you could?
- ☐ Is your IT talent **primarily focused on maintaining current systems**?
- ☐ Is your team **under-resourced** or **lacking in certain skill sets**?

2 Cost concerns:

- ☐ Are you challenged with **unpredictable** and **growing cloud costs**?
- ☐ Do multi-year CapEx commitments **complicate financial planning**?
- ☐ Is your existing infrastructure **underperforming on value and ROI**?

3 Infrastructure limitations:

- ☐ Have data volumes **grown significantly** in recent years?
- ☐ Are you regularly spending on **ongoing infrastructure updates/patches**?
- ☐ Do you face any challenges around **data quality and data availability**?

4 Security and compliance:

- ☐ Are there **gaps in visibility and control** at any point in the IT environment?
- ☐ Is IT regularly concerned with **issues around data privacy and compliance**?
- ☐ Do existing security measures **prioritize more reactive than proactive actions**?

5 Capacity for innovation:

- ☐ Are there questions or challenges around **accelerating AI/ML**?
- ☐ Do you need additional capabilities or resources **to drive new revenue streams**?
- ☐ Would teams and infrastructure need additional resources **to invest in new projects**?

If you said "yes" to three or more questions...

...we recommend considering an updated approach to infrastructure.

Three or more affirmative answers means you're most likely in a position to explore options that offer improved resource management, increased value, and a stronger foundation for future growth.

Discover a modern, flexible, and secure approach to enterprise cloud.

Transformation is nonnegotiable, but executing strategic IT can be tough.

GDT makes it simple with our fully managed private cloud solution, delivering the private infrastructure components you need in a cloudlike experience with bundled managed services.

INFRASTRUCTURE THAT CHECKS ALL YOUR BOXES

- ☒ Custom-built
- ☒ Fully managed
- ☒ Cost-controlled
- ☒ Secure & scalable
- ☒ Fast & flexible
- ☒ Future-focused

BENEFITS TO THE BUSINESS

Financial flexibility

Accelerated innovation

Enhanced visibility & control

Increased speed & productivity

Reliable compliance & security

Elevated end-user experiences
