MVP BREACH PROTECTION FROM GDT

Defend Against Security Threats with Confidence

The threat landscape continues to evolve, with the average cost of a security breach estimated at **$4.45 million in 2023*.** Yet many organizations struggle with disconnected tools, controls, and alerts that make it difficult to prioritize, investigate, and remediate threats.

Empower your SOC, streamline operations, speed detections, prioritize responses, and block threats across the entire organization with MVP Breach Protection from GDT. This Cisco-based solution unifies threat detection, investigation, and mitigation, integrating your entire Cisco security portfolio and select third-party tools across endpoints, email, network, and the cloud.

ACCELERATE THREAT DETECTION, PRIORITIZATION, AND MITIGATION

As a long-time Cisco partner with deep cybersecurity expertise, GDT experts can plan, implement, optimize, customize, and even manage detection and response to reduce risk and streamline security operations.

Backed by actionable threat intelligence and AI-driven insights, MVP Breach Protection from GDT enables your security organization to detect, prioritize, and mitigate threats across your entire environment with speed, efficiency, and confidence.

BENEFITS

- **Better efficacy:** Stop threats like ransomware with high-fidelity telemetry and pairing human expertise with AI
- **Better economics:** Elevate Tier 1 SOC analysts to Tier 2 performance with response guidance and automation
- **Better experiences:** Reduce time to investigate and recover with clear prioritization and streamlined investigations

KEY FEATURES

- Comprehensive planning, implementation, customization, and integrations
- Streamlined 24x7 security operations, including threat detection and mitigation
- Comprehensive threat visibility and early detection across email, endpoint, network, and cloud vectors
- Improved incident response with streamlined workflows, enriched context, and comprehensive attack visibility
- Enhanced, actionable threat intelligence, correlating telemetry across multiple sources
- Deep contextual insights to reveal attack scope and power accurate response

GDT

Security Is Part of Our DNA

As full-service IT provider, GDT takes a 360-degree, risk-based approach to cybersecurity, offering comprehensive lifecycle security and compliance services. GDT leverages a modern cybersecurity mesh designed for the distributed enterprise, allowing security to be extended confidently where it is most needed. GDT cybersecurity experts focus on increasing your agility to respond optimally to the changing threat landscape and technology ecosystem.
